Skills

- Ruby
- Rails
- JavaScript
- TypeScript
- React
- HTML
- CSS
- SQL
- React Native
- Python
- Lua
- Git
- Communication
- Cross-functional collaboration

Objective

I love working on cross-functional teams and solving difficult problems to create useful and exciting products. Let's make something great together!

Experience

Senior Software Engineer; Magoosh; Remote — May 2021 - Oct 2023

Technologies used: Ruby on Rails, React, TypeScript, PostgreSQL

- Made multiple upgrades to our payments system, including 3D Secure support and a custom implementation for monthly installments.
- Collaborated with the marketing team to migrate our marketing platform integration from Intercom to Braze with zero downtime.
- Built a new product, Magoosh Admissions, from the ground up, working closely with stakeholders to determine design needs and priorities.

Software Engineer; Magoosh; Berkeley, CA — Oct 2017 - May 2021

Technologies used: Ruby on Rails, React, TypeScript, PostgreSQL

- Identified the need for, designed and implemented a highly flexible content management system for Magoosh's growing set of training courses.
- Carried out multiple critical upgrades to core libraries with minimal downtime.
- Worked as the sole liaison between multiple teams to determine the requirements for a new live class scheduling system and implemented it under a tight deadline.
- Established the "engineering queue", working as liaison for our Student Help team, coordinating and implementing bug fixes and feature requests.

Software Engineer; Workday; San Francisco, CA — Dec 2014 - Oct 2017

- Worked with Data Analysts to develop data normalization tools for Workday's search platform using Ruby, Rails, JavaScript, and PostgreSQL.

Research Assistant; UC Berkeley; Berkeley, CA — Dec 2012 - Aug 2014

- Identified the need for and built multiple tools in Python to manage stimulus sets and subject data.

Education

University of California, Santa Cruz — BS in Neuroscience, 2012

App Academy, San Francisco, CA — Ruby & JavaScript bootcamp, 2014
